

NRPFSS AAPOR Transparency Initiative Immediate Disclosure Items

1. Who sponsored the research study

The Nebraska SHARP Surveillance System is administered by the Nebraska Department of Health and Human Services and the Nebraska Department of Education through a contract with the Bureau of Sociological Research at the University of Nebraska-Lincoln.

2. Who conducted the research study.

The Nebraska SHARP Surveillance System is administered by the Nebraska Department of Health and Human Services and the Nebraska Department of Education through a contract with the Bureau of Sociological Research at the University of Nebraska-Lincoln.

3. If who conducted the study is different from the sponsor, the original sources of funding will also be disclosed.

The 2016 NRPFSS is funded by the Substance Abuse and Mental Health Services Administration Center for Substance Abuse Prevention - Strategic Prevention Framework Partnerships for Success Grant Award 1U79SP020162-01 through the Nebraska Department of Health and Human Services Division of Behavioral Health.

4. The exact wording and presentation of questions and response options whose results are reported.

<http://bosr.unl.edu/nrpfss-questionnaires>

5. A definition of the population under study and its geographic location.

The NRPFSS targets Nebraska students in grades 8, 10, and 12 with a goal of providing schools and communities with local-level data. As a result, the NRPFSS is implemented as a census survey, meaning that every public and non-public school with an eligible grade can choose to participate.

6. Dates of data collection.

The 2016 NRPFSS was administered starting in August 2016 and concluding during February 2017.

7. A description of the sampling frame(s) and its coverage of the target population, including mention of any segment of the target population that is not covered by the design.

The NRPFSS is implemented as a census of Nebraska students in grades 8, 10, and 12, meaning that every public and non-public school with an eligible grade can choose to participate.

8. The name of the sample supplier, if the sampling frame and/or the sample itself was provided by a third party.

Not applicable to NRPFSS. The school list is provided by the Nebraska Department of Education.

9. The methods used to recruit the panel or participants, if the sample was drawn from a pre-recruited panel or pool of respondents.

All Nebraska schools with an eligible grade were first informed via mailed letter at the beginning of 2016 that they would have an opportunity to participate in the NRPFSS in the upcoming fall. Then, in March, active recruitment both through mailed letter, phone, and/or e-mail by BOSR began in an effort to get as many schools to participate

as possible. Once a school agreed to participate, all students in grades 8, 10, and 12 with parental permission were then asked to participate.

10. A description of the sample design, giving a clear indication of the method by which the respondents were selected, recruited, intercepted or otherwise contacted or encountered, along with any eligibility requirements and/or oversampling. The description of the sampling frame and sample design will include sufficient detail to determine whether the respondents were selected using probability or non-probability methods.

All Nebraska schools with an eligible grade were first informed via mailed letter at the beginning of 2016 that they would have an opportunity to participate in the NRPFS in the upcoming fall. Then, in March, active recruitment both through mailed letter, phone, and/or e-mail by BOSR began in an effort to get as many schools to participate as possible. Once a school agreed to participate, all students in grades 8, 10, and 12 with parental permission were then asked to participate.

11. Method(s) and mode(s) used to administer the survey (e.g., CATI, CAPI, ACASI, IVR, mail survey, web survey) and the language(s) offered.

The NRPFS is a self-administered, paper-pencil survey administered within the classroom. In 2016, the survey was only offered in English.

12. Sample sizes (by sampling frame if more than one was used) and a discussion of the precision of the findings. For probability samples, the estimates of sampling error will be reported, and the discussion will state whether or not the reported margins of sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors.

Because the NRPFS is a census, sampling error is not applicable. Also, the NRPFS data are not weighted in any way.

13. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported.

Not applicable to NRPFS.

14. If the results reported are based on multiple samples or multiple modes, the preceding items will be disclosed for each.

The NRPFS report indicates when a subsample of respondents is being referenced.

15. Contact for obtaining more information about the study.

Any questions regarding the 2016 NRPFS administration can be directed to the Bureau of Sociological Research at the University of Nebraska-Lincoln by calling (402) 472-3672 or by sending an e-mail to bosr@unl.edu.
