Results Snapshot

The NRPFSS 2025 collects data from Nebraska students in 8th, 10th, and 12th grades about their (1) substance use; (2) transportation safety; (3) violence, bullying, and mental health; (4) nutrition and physical activity; (5) feelings and experiences at home, school, and in the community, and (6) Social Media Use. In this report, highlights of the 2025 survey data for Cherry County are presented along with the 2016-2025 survey trends, when available. Below are the key takeaways from the 2025 survey results for Cherry County. This information as it relates to the NRPFSS is available on BOSR's website (<https://bosr.unl.edu/sharp/nrpfss/>).

- **Substance Use:** Among 8th grade students, 9.3% reported current alcohol use in 2025 compared to 5.5% statewide, reflecting a decrease of 23.8 percentage points in the county from 33.1% in 2023 versus a 2.8 point decrease statewide from 8.3%.
- **Transportation Safety:** Among 8th grade students, 24.5% reported riding in a vehicle with a driver who had been drinking alcohol compared to 14.6% statewide, showing a decrease from 33.0% in 2023 in the county while the state decreased from 16.5%.
- **Bullying and Violence:** Among 8th grade students, 69.6% reported any instance of bullying compared to 62.3% statewide, representing a decrease from 75.5% in 2023 in the county while the state was 62.4%.
- **Mental Health:** Among 8th grade students, 52.5% reported feeling depressed compared to 29.4% statewide, reflecting from 33.4% in 2023 in the county while the state decreased from 32.3%.
- **Nutrition and Physical Activity:** Among 8th grade students, 88.9% reported being physically active for at least 60 minutes compared to 91.0% statewide, showing an increase from 81.3% in 2023 in the county while the state from 90.0%.
- **Feelings at Home and at School:** Among 8th grade students, 82.1% reported feeling safe at school compared to 90.5% statewide, reflecting a decrease of 4.0 percentage points from 86.1% in 2023 in the county while the state increased by 4.0 points from 86.5%.
- **Social Media Use:** Among 8th grade students, 32.3% reported using social media about once a day or less compared to 26.5% statewide, while 25.7% reported use more than once an hour compared to 27.1% statewide, indicating slightly lower high-frequency use in the county relative to the state.

Substance Use

This section contains information on the use of alcohol, tobacco, and other drugs among 8th, 10th, and 12th grade students in Cherry County. In addition, there is information on attitudes and perceptions, the sources of substances, and other substance-related topics. To provide greater context for the results from Cherry County, the state results are presented when available.

Substance use

* Percentage who reported using the named substance one or more times in their lifetime.
** Percentage who reported using the named substance one or more times during the past 30 days.
*** Percentage who reported having five or more drinks of alcohol in a row, within a couple of hours.
^ The county n-size displayed is the largest n-size across these questions. Because each question is asked individually, the n size may vary. Result is not available due to the response number is less than 10.

Trends of Alcohol Use, 2016-2025

	County					State				
	2016	2018	2021	2023	2025	2016	2018	2021	2023	2025
Lifetime* alcohol use										
8th	42.2%	24.2%	44.3%	42.8%	25.1%	22.5%	27.2%	27.2%	26.0%	17.0%

N/A: Result is not available due to the response number is less than 10.

2021 and 2023: 10th and 12th grades did not participate in the survey.

* Percentages reporting one or more days to the question “During the PAST 30 DAYS, on how many days did you carry a weapon such as a gun, knife, or club on school property?” Result is not available due to the response number is less than 10.

Trend date are not available.

* Percentages reporting one or more days to the question “During the PAST 30 DAYS, on how many days did you carry a weapon such as a gun, knife, or club on school property?” Result is not available due to the response number is less than 10.

Trend date are not available.

Social Media Use

This section contains information on experiences using social media for 8th, 10th, and 12th grade students in Cherry County. These questions were added to the 2025 NRPFS in September 2025. Trend data are not available. The schools who took the survey during August 2025 or took the paper survey did not have access to these questions.

* Percentages reporting 10 or younger, 11, or 12 to the question "How old were you when you first: - began using social media?" AMONG students who reported using social media. Result is not available due to the response number is less than 10.

* Percentage AMONG students who reported using social media. Result is not available due to the response number is less than 10.

How Soon to Use Social Media after Waking Up*, 2025

* Percentage AMONG students who reported using social media. Result is not available due to the response number is less than 10.

Feelings after Using Social Media*, 2025

* Percentage AMONG students who reported using social media. Result is not available due to the response number is less than 10.

Time Spent in Front of a Screen Daily*, 2025

* Percentage AMONG students who reported using social media. Result is not available due to the response number is less than 10.

Parents Having Rules about What the Student Does on the Internet, 2025

Appendix

APPENDIX A: About the NRPFSS

This report summarizes the findings from the 2025 Nebraska Risk and Protective Factor Student Survey (NRPFSS). The 2025 survey represents the 11th implementation of the NRPFSS and the 8th implementation of the survey under the Nebraska Student Health and Risk Prevention (SHARP) Surveillance System. SHARP consists of the coordinated administration of three school-based student health surveys in Nebraska, including the NRPFSS, the Youth Risk Behavior Survey (YRBS), and the Youth Tobacco Survey (YTS). The Nebraska SHARP Surveillance System is administered by the Nebraska Department of Health and Human Services and the Nebraska Department of Education through a contract with the Bureau of Sociological Research (BOSR) at the University of Nebraska-Lincoln. For more information on the Nebraska SHARP Surveillance System please visit <https://bosr.unl.edu/sharp/>.

As a result of the creation of SHARP and its inclusion of the NRPFSS, the administration schedule shifted from the fall of odd calendar years to the fall of even calendar years. The first three administrations of the NRPFSS occurred during the fall of 2003, 2005, and 2007, while the fourth administration occurred during the fall of 2010, leaving a three-year gap (rather than the usual two-year gap) between the most recent administrations. The 2012, 2014, 2016, and 2018 administrations also occurred during the fall. Due to the COVID-19 pandemic, the 2020 administration was postponed to 2021, again leaving a three-year gap. The 2023 and 2025 administration occurred during the fall. All future administrations take place during the fall of odd calendar years as well (i.e., every two years).

The NRPFSS targets Nebraska students in grades 8, 10, and 12 with a goal of providing schools and communities with local-level data. As a result, the NRPFSS is implemented as a census survey, meaning that every public and non-public school with an eligible grade can choose to participate. The survey is designed to assess adolescent substance use, delinquent behavior, and many of the risk and protective measures that predict adolescent problem behaviors. The NRPFSS is adapted from national, scientifically-validated surveys and contains information on risk and protective measures that are locally actionable. These risk and protective measures are also highly correlated with substance misuse as well as delinquency, teen pregnancy, school dropout, and violence. Along with other locally attainable sources of information, the information from the NRPFSS can aid schools and community groups in planning and implementing local prevention initiatives to improve the health and academic performance of their youth.

The 2025 NRPFSS is sponsored by the 2023 Strategic Prevention Framework - Partnership for Success grant and the 2024 Substance Use Prevention Treatment Recovery Services Block Grant for the Substance Abuse and Mental Health Services Administration Center for Substance Abuse Prevention through the Nebraska Department of Health and Human Services Division of Behavioral Health. The Bureau of Sociological Research (BOSR) at the University of Nebraska – Lincoln (UNL) collected the NRPFSS data for this administration as well as the 2010, 2012, 2014, 2016, 2018, 2021, and 2023 administrations. As part of BOSR’s commitment to high quality data, BOSR is a member of the American Association for

Public Opinion Research (AAPOR) Transparency Initiative. As part of this initiative, BOSR pledges to provide certain methodological information whenever data are collected. To view the NRPFS methods, please visit <https://bosr.unl.edu/sharp/nrpfss/>.

Table 1.1 provides information on the student participation rate for Cherry County compared to the State of Nebraska. The participation rate represents the percentage of all eligible students who took the survey. If 60 percent or more of the students participated, the report is generally a good indicator of the levels of substance use, risk, protection, and delinquent behavior in county. If fewer than 60.0 percent participated, a review of who participated should be completed prior to generalizing the results to the entire student population.

Table 1.1. Survey Participation Rates 2025

Grade	County			State of Nebraska		
	Number Participated	Number Enrolled	Percent Participated	Number Participated	Number Enrolled	Percent Participated
8th	45	51	88.2%	3377	26511	12.7%
10th	12	52	23.1%	2880	27197	10.6%
12th	6	45	13.3%	2194	28249	7.8%
Total	63	148	42.6%	8451	81957	10.3%

Note: The grade-specific participation rates presented within this table consist of the number of students who completed the NRPFS divided by the total number of students enrolled in the county/state.

Statewide data is “weighted,” meaning it has been adjusted to represent all students across the state. This allows you to compare your county’s results to the state average to see how your students are similar to or different from students statewide. Local county-level data is not weighted and reflects only the students who completed the survey. When reviewing local results, consider the number and characteristics of students who participated, as the data may not fully represent the entire student population.

Again, the goal of the NRPFS is to collect county and community-level data and not to collect representative state data. However, state data provide insight into the levels of substance use, risk, protection, and delinquent behavior among Nebraskan students, especially students in rural areas other than in Douglas, Lancaster, or Sarpy counties. In 2025, 10.3 percent of the eligible Nebraska students in grades 8, 10, and 12 participated in the NRPFS; 77.9 percent of these participations came from the areas outside of Douglas, Lancaster, and Sarpy counties.

The 2025 participation rate for the state remains lower than the 60.0 percent level recommended for representing students statewide, so the state-level results should be interpreted with some caution. Failure to obtain a high participation rate statewide is, in part, due to low levels of participation within Douglas, Lancaster, and Sarpy Counties, which combined had a 4.0% participation rate in 2025 compared to 19.0% for the remainder of the state.

Table 1.2 provides an overview of the characteristics of the students who completed the 2025 survey within the county and the State of Nebraska.

Table 1.2. Participant Characteristics 2025

	County		State of Nebraska	
	n	%	n	%
Total students	64		8469	
Grade				
8th	45	70.3%	3377	39.9%
10th	12	18.8%	2880	34.0%
12th	6	9.4%	2194	25.9%
Unknown	1	1.6%	18	0.2%
Gender				
Male	39	60.9%	4282	50.6%
Female	24	37.5%	4147	49.0%
Unknown	1	1.6%	40	0.5%
Race/Ethnicity				
Hispanic or Latino	6	9.4%	1648	19.5%
Black or African American	3	4.7%	342	4.0%
Asian	2	3.1%	176	2.1%
American Indian or Alaska Native	9	14.1%	358	4.2%
Native Hawaiian or Pacific Islander	0	0.0%	27	0.3%
Middle Eastern or North African	0	0.0%	17	0.2%
White	44	68.8%	5694	67.2%
Other race	0	0.0%	142	1.7%
Unknown	0	0.0%	65	0.8%

Notes. In columns, n=number or frequency, and %=percentage of distribution.

The reporting rules for the NRPFS are:

- 1) When there are less than 10 survey respondents for a particular grade, their responses are not presented in order to protect the confidentiality of individual student participants.
- 2) if a grade level has 10 or more respondents but an individual question or sub-group presented in this report has less than 10 respondents then results for the individual item or sub-group are not reported.

A number of honesty measures were also created to remove students who may not have given the most honest answers. These measures included reporting use of a fictitious drug, using a substance during the past 30 days more than in one's lifetime, answering that the student was not at all honest when filling out the survey, and providing an age and grade combination that are highly unlikely. Students whose answers were in question for any one of these reasons were excluded from reporting. For the State of Nebraska, 330 students met these criteria. Among these students, zero students were in Cherry County.

APPENDIX B: Tips for Using the NRPFS Results

As a valued stakeholder in your community, you play an important role in prevention by teaching skills, imparting knowledge, and helping to establish a strong foundation of character and values based on wellness, including prevention of substance use, suicide, and other risky behaviors. Preventing mental and/or substance use disorders in children, adolescents, & young adults is critical to promoting physical health and overall wellness.

There are a variety of strategies (or interventions) that can be used to increase protective factors and reduce the impact of risk factors. Prevention in schools is often completed through educational programs and school policies & procedures that contribute to the achievement of broader health goals & prevent problem behavior.

Six Prevention Strategy Categories

Alternative

Provides for participation in activities that exclude alcohol and drug use through the provision of constructive and healthy activities.

Examples:

- Drug-free social and recreational activities (e.g., dances or parties)
- Youth and adult leadership activities
- Community drop-in centers
- Community service activities
- Mentoring programs

Community-Based

Aims to enhance the ability of the community to more effectively provide substance abuse prevention services through organizing, planning, coalition-building, and networking.

Examples:

- Community and volunteer training
- Systematic planning
- Multi-agency coordination and collaboration
- Accessing services and funding
- Community team-building

Education

Provides information and activities aimed at critical life and social skills, including decision-making, refusal skills, and critical analysis through two-way communication.

Examples:

- Classroom and small group sessions
- Parenting and family management classes
- Peer leader and peer helper programs
- Education programs for youth groups
- Groups for children of substance abusers

Environmental

Seeks to establish or change community standards, codes, and attitudes to influence the incidence and prevalence of drug misuse in the general population.

Examples:

- Establishment and review of drug policies in schools
- Technical assistance to maximize local enforcement procedures
- Review and modification of alcohol and tobacco advertising practices
- Product pricing strategies

Information Dissemination

Provides information about the nature of drug use, misuse, and addiction through one-way communication from source to audience, with limited contact between the two.

Examples:

- Clearinghouses and information resource centers
- Resource directories
- Media campaigns and brochures
- Radio and television public service announcements
- Speaking engagements and health fairs

Problem Identification & Referral

Aims to identify those who have misused substances to assess if their behavior can be reversed through education. Does not include activities to determine if treatment is needed.

Examples:

- Brief screening/intervention
- Driving-while-intoxicated education programs
- Employee assistance programs
- Student assistance programs
- Teen courts

Evidence-Based Practice Registries

You may also wish to do your own research. The following websites provide listings of evidence-based practices:

SAMHSA Evidence-Based Practices Resource Center

A searchable online evidence-based repository and review system designed to provide the public with reliable information on mental health and substance use interventions available for implementation.

<https://www.samhsa.gov/ebp-resource-center>

Blueprints for Healthy Youth Development

A searchable registry providing information about evidence-based programs that prevent or reduce the likelihood of antisocial behavior and promote a healthy course of youth development and adult maturity.

<https://www.blueprintsprograms.org>

Suicide Prevention Resource Center

Provides a variety of suicide prevention resources, tools, and training for schools and communities.

<https://sprc.org>

Nebraska Requirements & Crisis Resources

LB923 Requirement:

In accordance with LB923, public school staff in Nebraska are required to complete at least 1 hour of suicide awareness and prevention training each year. Resources on Bullying Prevention and Suicide Prevention are listed on the Nebraska Department of Education website.

education.ne.gov/Safety

SAMHSA Print Materials:

Toolkits for school personnel, educational fact sheets for parents and caregivers, wallet cards and magnets with the National Suicide Prevention Lifeline. Topics include depression, trauma, anxiety, and suicide.

store.samhsa.gov

Boys Town — Your Life Your Voice:

Wallet cards & other promotional materials available at no cost for distribution to students, school staff, and parents.

Remember: talking about suicide with a student does not put the idea of attempting suicide in a student's mind
