

NEBRASKA RISK AND PROTECTIVE FACTOR STUDENT SURVEY

NRPFS

WHO?

- Nebraska public and private school students in grades 8, 10 and 12

WHAT?

- Offered as a web or paper and pencil survey
- Takes approximately 30 minutes to complete

WHEN?

- Conducted in the fall of odd years (late August-December)
- School administrator will pick the week their school administers

WHY?

- Data generates reports at the state, county, school district, health department, regional behavioral health authorities, and coalition-levels
- Collects information related to substance use, delinquent behaviors, bullying, and risk and protective measures that predispose youth toward or protect them against problem behaviors
- Local and regional statistics are used for planning and evaluation of public health and education programs
- To access state and federal funds, schools and community stakeholders use NRPFS data in grant applications
- Data are used for federal-level reporting

FOR MORE INFO

- Serves as a robust data source for state and local health departments as well as coalitions and agencies working to reduce tobacco use
